Fracture Boots

OSSUR

Rebound® Air Walker

The Rebound Air Walker features a host of details designed to provide added protection, superior compression, simplified application and usage, improved comfort and, ultimately, successful patient outcomes. The integrated air pump provides easy inflation/deflation and consistent compression and the rocker bottom is specially designed to help promote a natural, stable gait.

Indications:

- * Grade 2 and 3 **ankle sprains**
- * Stable foot and ankle **fractures**
- * Trauma
- * Post-operative and rehabilitation purposes

AIRCAST

XP Walker™ (extra pneumatic)®

The XP Walker has features to increase comfort, simplify use, and promote compliance while still retaining the clinically effective elements found in the original prefabricated walking brace by Aircast.

Each XP Walker features a low rocker sole for added comfort and ease of ambulation and a wider foot base ensuring plenty of room for dressings without sacrificing comfort. Lining the shell are overlapping aircells which provide intermittent pneumatic compression for efficient edema reduction and callus formation, and can be custom-inflated using the hand bulb (included) for a "total contact" fit.

Ankle Braces

AIRCAST

AirSport™ Ankle Brace

The AirSport Ankle Brace incorporates clinically proven Air-Stirrup® Ankle Brace features, such as a semi-rigid shell and aircells, to provide comfort and support. Additional compression and stabilization is provided by ATF (anterior talofibular) cross strap and integral forefoot and shin wraps. The unique "step-in" design (toes first inserted into the back of the brace) and automatic heel adjustment make the AirSport extremely fast and easy to put on, just: Step In, Strap Up, And Go!

Other Products

Cryocuff

AIRCAST

Cryo/Cuff

The Cryo/Cuff combines focused compression with cold therapy to provide optimal control of swelling to minimize hemarthrosis, edema and pain. Simplicity of design and ease of operation makes it ideal for post-operative recovery, trauma, athletic training and home use. Clinical Studies proves that cold and compression are effective in reducing post-operative swelling and regaining ROM.

Ankle, Knee, Shoulder, Back, Hip and Rib

Patello-Femoral Tracking Braces

DONJOY

Tru-Pull Lite Knee Brace

Latest patented technology from the Tru-Pull family of products. For acute mild to moderate patellar subluxation or dislocation and maltracking.

Shoulder Dislocation Stabilization Braces

Shoulder Stabilizer (developed by Dr. Tom Sawa)

Provides shoulder immobilization and controlled range of motion for glenohumeral dislocations/subluxations, rotator cuff tears, and acromioclavicular separations. The shoulder brace is designed to protect and stabilize the shoulder post-injury and post-operatively.

CORE X SYSTEM

The Core X System™ was developed by Alex McKechnie, trainer to professional athletes. His muscle rehabilitative system used for top athletes was reinvented to strengthen and beautify the bodies of everyday people. The Home Fitness System is designed to change your body by losing inches in your waist, hips, buns, and thighs, by strengthening and toning your upper body, abs and core, and lower body. The use of "X effects" resistance powerfully shapes lean muscles yet is easy and gentle on the body (joints and muscles). It provides a full body workout in just minutes a day.
